Welcome to Online Learning at Georgia Perimeter College.

As part of our ongoing commitment to your continuing development we are introducing a learning initiative that can be accessed from the convenience of your desktop computer.

This new initiative is e-Learning. e-Learning is a developmental tool that you can utilize in your own time and at your own pace. e-Learning is not intended to replace instructor-led training courses, it is designed to supplement traditional methods and provide a greater opportunity for your skill development.

Our goal is to support your development through innovative online learning that can be accessed 24 hours a day, 7 days a week. With our new online learning program, you can look forward to accessing a diverse library of content. These courses cover a wide variety of subject matter in order to meet the various training needs of all our employees—from highly technical topics to software application instruction to business skills development. These courses, and associated components, can be used as reference tools to help answer your day-to-day on the job questions or as part of your personal development.

We expect that each of you will recognize the benefits of this program and will take full advantage of this opportunity.

How to Enroll/Access:

Access Skillsoft at www.gpc.edu/training.

To register for an account, simply enter your GPC username and password. You will automatically be registered in the SkillSoft system.

You may use Internet Explorer or Mozilla Firefox to open Skillsoft training programs.

Referenceware® from Books24X7®

Upon accessing this new online initiative, you will also receive the added benefit of access to Referenceware® from Books24X7®. Referenceware® is an online book resource offering unobstructed access to thousands of the latest and best business and technical books.
