

All the Elements You Need

Houghton-Mifflin Chemistry Team

Discover flexible, interactive and dynamic technology solutions for Chemistry instruction and learning during this presentation by the Houghton Mifflin Chemistry team. Learn about *Eduspace*® (powered by Blackboard™), an Online Learning Environment that combines text-specific content with course management tools, and *ChemWork*, an interactive online homework solution.

ChemWork problems are designed to help students learn the process of thinking like a chemist while working through chemistry concepts, and are included withing *Eduspace*®. Developed by Steven and Susan Zumdahl to ensure a consistency of approach – from book-supported learning in the classroom to independent homework practice – *ChemWork* provides questions, hints, and immediate feedback to help students work through the problem-solving process.
