

## **Guidelines for Chemistry Programs in Two-Year Colleges: A Resource for Institutional Self-Study and Program Review**

**Doug Sawyer**

Department of Chemistry, Scottsdale Community College, Scottsdale, AZ 85256

This workshop will explore how the *Guidelines for Chemistry Programs in Two-Year Colleges* can be used to design and strengthen programs. Developed by the American Chemical Society, the guidelines provide a comprehensive model for institutions that grant associate degrees. After reviewing what the guidelines cover and how they have been used, participants will provide input for the upcoming revision. The guidelines are available at [www.chemistry.org/education/2year.html](http://www.chemistry.org/education/2year.html).
